EXECUTIVE SUMMARY

I'm curious to explore opportunities in the field of research and analytics having equipped with strong skills in python and data science tools which would strengthen my analytical capabilities. A keen observer with a focused and analytical approach to understanding complex datasets and uncovering actionable insights. Naturally curious and committed to continuous learning, with a proactive mindset toward exploring emerging technologies and innovative analytical techniques. Dedicated to transforming data into meaningful business value while maintaining accuracy, quality, and strategic thinking. Demonstrated leadership by taking initiative in forming and managing project teams, fostering collaboration, and driving projects toward successful outcomes. Strong communication and team management skills enable effective collaboration in dynamic environments.

TECHNICAL SKILLS

- Programming: **Python**
- Data Visualization: **Matplotlib, Power BI**
- Data Analysis: **Microsoft Excel, NumPy, Pandas, Scikit-learn**
- Database management: **MySQL**
- Development tools: **GitHub, Docker**

ADDITIONAL SKILLS

- Reporting
- Documentation
- Figma Design

PROJECTS

- Designed and developed a relational database to manage inventory, suppliers, customers, and sales transactions using MySQL. Implemented SQL queries, JOINS, aggregate functions, and stored procedures to perform inventory tracking, stock monitoring, and sales reporting. Tech Stack: **MySQL, Docker**
- Developed an interactive Power BI dashboard to analyze sales performance, revenue trends, regional sales, and product-wise profitability. Tech Stack: **Power BI**
- Designed a mechanism for predicting brain rot by user's activity duration and the categories of the application they use. This serves as an efficient data for detecting the possibility of brain rot, so that the generated insights can support mental health professionals and users in identifying unhealthy digital usage patterns and encouraging healthier digital habits. Tech Stack: **Streamlit, Python, Docker**
- Built a machine learning model using Support Vector Machine (SVM) to predict COVID-19 infection based on patient health parameters. Performed data preprocessing, feature selection, model training, and evaluation using Python and Scikit-learn. Assessed model performance using accuracy, precision, recall, and F1-score to ensure reliable prediction results. Tech Stack: **Scikit-learn, NumPy, Pandas, Docker**
- Developed an AI-based travel assistant that provides personalized destination recommendations and itinerary suggestions based on user preferences. Integrated natural language processing techniques to understand user queries and generate contextual travel recommendations. Designed a scalable architecture combining Python, AI services, and data-driven recommendation logic to enhance user experience. Tech Stack: **React, Node.js, Google Maps API, Tailwind CSS, Github**

EDUCATION

Peri Institute of Technology

B.tech in Artificial Intelligence and Data Science - 8.67 CGPA

2023 - 2027

St.Bede's Anglo Indian Higher Secondary School

12th - 83%

2022 - 2023

REWARDS & ACHIEVEMENTS

- **Emerging talent Award** by Peri Institute of technology - 2024
- **Runner-Up** : SQL Code Off conducted by Easwari Engineering College
- **Runner-Up** : Tech battle conducted by SRM Institute of Science and Technology
- **3rd** - Pixel Memo conducted by Peri Institute of Technology

CERTIFICATIONS

- **Participated in 24hr hackathon conducted by SIMATS**
- **Project built:** Voice Agent for Devops tools such as Docker and GitHub
- **Purpose:** Developers often use devops tools for manage project by collaborating with peers. This AI Agent enables users to command via speech which uses NLP techniques to convert speech to commands for pushing and pulling the repositories
- **Tech stack:** Tkinter, Python, Github API, NLTK, Speech Recognition
- **Participated in 24hr hackathon conducted by St.Joseph's College of Engineering**
- **Project built:** Unified Mentor Platform to connect students and professionals
- **Purpose:** A unified platform for visualizing job market trends, live blogs for courses and concepts, connect with peer mentors, customized career path, Q/A chatbot etc
- **Tech stack:** HTML, CSS, JavaScript, Node.js, Ollama API, etc
- **IIC Regional Meet Hosted by St.Joseph's Institute of Technology**
- **Introduction to Cybersecurity by Cisco**
- **AWS AI Practitioner Challenge**
